## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The prior art, including the newly cited references filed on July 17, 2006, fails to teach or suggest "a first control status register for identifying a first target set of data storage devices from which a first source operand of a fetched instruction is to be retrieved and for identifying a second target set of data storage devices to which a first result of an executed instruction is to be stored, wherein at least one of said first or said second target set of data storage devices is not included in the first set of data storage devices" in combination with the claimed multithreaded computer including at least the embedded pipeline processor, the first as second storage devices, the thread scheduler, and the instruction set. This claimed combination is additionally unobvious to one of ordinary skill in the art at the time of the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tonia L. Meonske whose telephone number is (571) 272-4170. The examiner can normally be reached on Monday-Friday with first Friday's off.
